

MIRA ASYMMETRIC

Taking a fresh approach to providing functional, full-room illumination. Mira's advanced optics create an asymmetric lighting distribution on walls and ceiling which reflects evenly to fully illuminate a space. Its indirect lighting design ensures a glare-free experience.

Performance

300LPF			
Distribution	Output	Input W	Efficacy
Wall Wash	324 lm/ft	2.8 W/ft	118 lm/W
Ceiling Wash	324 lm/ft	2.8 W/ft	118 lm/W
Wall + Ceiling Wash	649 lm/ft	5.5 W/ft	118 lm/W

600LPF			
Distribution	Output	Input W	Efficacy
Wall Wash	584 lm/ft	5.0 W/ft	117 lm/W
Ceiling Wash	584 lm/ft	5.0 W/ft	117 lm/W
Wall + Ceiling Wash	1167 lm/ft	10.0 W/ft	117 lm/W

1150LPF			
Distribution	Output	Input W	Efficacy
Wall Wash	1151 lm/ft	10.5 W/ft	110 lm/W
Ceiling Wash	1151 lm/ft	10.5 W/ft	110 lm/W
Wall + Ceiling Wash	2302 lm/ft	21.0 W/ft	110 lm/W

Based on static white 3500K. For the complete photometric data of this fixture go to page 3.

Maximum run length per power drop

Maximum current per run length is 5.5Amps. Run lengths per power drop are calculated by multiplying the max current by the voltage of the circuit, then dividing the result by the consumption per foot.

For example : $(5.5A * 120V) / (10W/ft) = 66ft$ per power drop.

Need several power drops for continuous rows? Have questions?

We know that having so many options can be overwhelming. Please reach out to our factory for any specific request or questions you have.

Our Design Assist team (designassist@allights.com) is here to make the process move smoothly.

Installation

Aircraft cable

Distance from wall and ceiling : 12-18"
(recommended 18")

Note : For configuration using wall wash only, we recommend to use ceiling mount fixtures. Or pendant mount fixtures when fixture distance from ceiling exceeds 30 inches.

Wall mount

Distance from ceiling : 12-18"
(recommended 18")

Ceiling mount

Distance from wall : 12-18"
(recommended 18")

LINEAR DIMENSIONS

2', 3', 4', 5', 6', 7' and 8' nominal length as individual fixtures or joined to create continuous row lengths, minimum fixture lengths is 2 feet. Patterns comprised of 90° joiners provide a multitude of geometric options and architectural transitions.

Custom - Contact Design Assist for modifications to product not detailed within the specification sheets.

OPTICS

Mira uses advanced in-house developed optics to create a stunning asymmetric light distribution. The meticulously designed extraction features on the edge lit optics allow the light to reach far forward, creating a beautiful and impactful illumination.

LED LIGHT SOURCE

Custom manufactured linear board array uses high performance Nichia® LEDs in combination with a performance driven heat sink technology. Tested in accordance with LM79 and LM-80; L70>60,000hr; operated at reduced output for high efficacy and lumen maintenance. 2700K, 3000K, 3500K, and 4000K with standard 80+ CRI; other color temperatures and 90+ CRI available. LED color variation is maintained at a 3-step MacAdam ellipse (SDCM 3x). LEDs are available in Standard and High outputs. Refer to photometry for delivered lumens.

LED DIMMING DRIVER

Standard constant voltage 120-277V electronic driver with 0-10V dimming control is standard. Specification grade dimming down to 1%. Max Driver life of 50,000 hrs with ambient operating temperature range of -20°C to 50°C, maximum case temperature of 80°C. Electrical specifications at maximum driver load: PF >0.90, THD < 20%, >90% Efficiency.

EMERGENCY

This luminaire is available with a factory installed LED emergency lighting battery pack for both normal and emergency operation, 120-277V only. This fixture integrated unit contains long-life Ni-Cad recyclable batteries, 24-hour charger, and converter circuit. Test switch and charge indicators provided. Integral test button. Emergency mode provides constant power to a nominal 12W LED load for a period of 90 minutes. Please consult the factory for emergency configuration assistance. Our Design Assist team (designassist@alights.com) is always available for collaboration and specification support.

MOUNTING

Suspension with aircraft cables includes 48" standard length 1/16" stainless steel adjustable aircraft cables with secure ceiling grippers to field set suspension length. 4-1/2" x 4-1/2" square white canopies, unless otherwise noted. Cord strain also included for power canopies. Black power cord provided for black and titanium finish. White power cord provided for all other fixture finishes unless otherwise specified.

Direct wall mounting comes with wall brackets that can be installed directly on the wall on a junction box. (2) wall brackets are provided for fixtures less than 7ft. Fixtures longer than 7ft are provided with (3) brackets. Power feed holes are pre-drilled and mounting hardware is pre-installed at the factory to the fixture housing.

Surface ceiling is offered with die-cast mounting blocks with sheet metal brackets used to provide a firm flexible mounting option.

Mullion blocks are used to mount fixtures to a horizontal window mullion and can also be used to offset fixtures from the wall. 1/2" and 1" offsets are available standard. Custom offsets are also available upon request. (2) Mullion blocks are provided for fixtures less than 7ft. Fixtures longer than 7ft are provided with (3) blocks. Power feed holes are pre-drilled and mounting hardware is pre-installed at the factory to the fixture housing.

NLIGHT® AIR WIRELESS

The integrated API smart sensor is part of each luminaire in the nLight® AIR network, which can be grouped to control multiple luminaires. The granularity of control with the digital PIR occupancy detection and daylight sensing makes a great solution for any application. Optionally you can order nLight® AIR sensors for compatibility with an nLight Air wireless system. The rIO model are available for integration nLight enabled, remote mounted controls provided by others. Please contact an Acuity controls representative for more information.

STRUCTURE

Robust, high quality 60% recycled aluminum extruded housing. Precision die-casted aluminum joiners and endcaps. 2 lbs/ft approximate fixture weight.

FINISH

Electrostatically applied powder coat finish. Standard finish options include titanium, white, and black. Other colors and custom finish options available, specify RAL# or contact factory regarding custom finish requirements. Canopy and cover plates standard finish is white, unless otherwise noted.

LISTING

UL/CUL rated for Damp Locations. Tested in accordance with UL 1598 and certified to CEC/CSA C22.2.

The Mira is assembled in the U.S.A. and comply with the Buy America(n) Act (BAA), Build America, Buy America (BABA) government procurement requirements under FAR, DFARS, and DOT.
